

NEW Plastek™ ESD Trash Receptacles

- ESD protective product to replace high charging plastic trash cans
- Chemical and moisture resistant
- Superior strength and durability; made from extruded high impact polypropylene material
- Convenient fold down design for easy storing
- Conductive Rtt 1 x 10E2 < 1 x 10E5 ohms
- Reusable
- ESD protective liners also available
- Made in the United States of America

37817 in use

37816

37823

36 gallon capacity

- Ideal for use inside ESD protected areas
- Low cost, economical
- Surface Resistance: < 10E11 ohms
- Durable Thickness: 0.002 in (2.0 mil)
- Packaged 50 bags per pack
- Made in the United States of America

"It should be understood that any object, item, material or person could be a source of static electricity in the work environment. The removal of unnecessary nonconductors, replacing nonconductive materials with dissipative or conductive materials and grounding all conductors are the principle methods of controlling static electricity in the workplace, regardless of the activity." [ESD Handbook ESD TR20.20-2008 section 2.4 Sources of Static Electricity]
